

# 4 Good Reasons why you should use K C BAKING POWDER

1. It cuts the *Cost of Living*.
2. It is a *quality* product.
3. The government uses it.
4. The price *NOW* is the same as before and during the War—

## 25 Ounces for 25¢

Millions of pounds of K C Baking Powder were bought by the government for our troops overseas — more than all other brands combined.

## KING GRIDIRON IS NOW IN HIS FIFTIETH SEASON IN AMERICA'S SPORT WORLD

Fifty years ago last Thursday, on Nov. 6, 1869, the first intercollegiate football game was played. This was the historic contest between Princeton and Rutgers, fought out on the seminary campus of Rutgers college at New Brunswick, N. J., which resulted in a victory for Rutgers by a score of 6 to 4.

Although the beginnings of football in America are shrouded in myth and legend, there is no uncertainty regarding the date, game, and result of the first intercollegiate battle. As for the details of the play in that game, history is not so specific.

Prior to the Rutgers-Princeton contest some form of football had been played for several years at the colleges as an intramural amusement. The greatest influence undoubtedly in the initial emergence of the game from an intracollegiate to an intercollegiate sport was the proximity of Princeton and Rutgers, and the fact that there had long been an intense rivalry between the two institutions for the possession of a cannon used in the battle of Princeton. This Revolutionary relic was captured and recaptured first by one college and then by the other in a series of raids covering a considerable period of years. Princeton finally obtained possession, and saw to it that there was no danger of a further exchange by sinking the cannon in solid cement.

Rutgers challenged Princeton for the game. The university title of Princeton had not then been adopted and the challenge was sent to Nassau Hall. Rutgers asked for three games, to be played in New Brunswick, Princeton, and again on the Rutgers field. A

point of difference between the two colleges in the matter of rules was to be settled by allowing the rules of each college to obtain on the home campus. Nassau permitted a free kick from a catch of a fly or first bound, while Rutgers ignored the catch and the privilege of a kick afterward.

Accepted. The conditions were accepted. Bill Gummere, 70, of Princeton, and Bill Leggett, 72, of Rutgers, were the two captains. Gummere afterward became Chief Justice of the supreme court of New Jersey, and Leggett became one of the most distinguished clergymen of the Reformed Church in America. The match was played on the Seward Street Common, which is still a part of the Rutgers campus. No admission fee was charged. Princeton sent a large representation of its undergraduates to the game and the best of feeling and courtesy was observed throughout the activities. Even at that early day, however, college yells and songs were a feature of the game. The scarlet of Rutgers was very much in evidence, but Princeton had not then adopted the orange and black as its representative colors.

The players appeared for the game in their ordinary clothes and to dress for the performance merely divested themselves of their coats, hats, and vests. The Rutgers team wore red turbans, which were the only semiregular uniform sported by either organization. The game itself was more nearly like the soccer game of today than like present-day football. There were twenty-five players on each side, and there were no officials. There were

two goalkeepers and the rest of the team was divided into two sections. One section was reserved largely for defensive purposes and confined its activities to a certain part of the field only, while the other section followed the ball.

Rutgers scored first. A goal then was termed a "game." It is recorded of this first goal or "game," in the first football game in America, and perhaps the first game of its kind in the world, that Princeton had the kick-off, and that Rutgers then carried the ball by a steady succession of short kicks and dribbles all the way to a score without a Princeton player being able to touch the ball.

Michael Stars. J. Edward Michael played a star part for Princeton and scored the second goal. Rutgers made the third goal, and then Princeton tied it up again. Rutgers scored the fifth and sixth goals, and then Princeton, following a long and furious exchange of advantage, scored two more and once more tied it up. Thereafter, however, Rutgers, obeying Captain Leggett's instructions to keep the ball as close to the ground as possible, lessening Princeton's chance to get hold of it, outplayed the man from Old Nassau and scored the two other goals that clinched the victory, each goal, of course, counted only one point at that time.

The most thrilling moment of the game is said to have occurred when Michael—"Big Mike," as he was called—set out with George Large of Rutgers in a chase for the ball when it was rolling toward the side lines. The ball struck the fence before either player could reach it, and the two men hit the fence with such momentum that it gave way and precipitated an excited mob of students who were sitting on it to the ground. Big Mike and J. G. Weir are credited with having played the star game for Princeton, and Captain Leggett shone for the New Brunswick men.

Rules for the game were not fixed, but it was agreed upon in advance that the ball could be kicked, batted by the hand and thrown, but not carried. The ball was round and of rubber, about ten inches in diameter. Although it

### SHE'S LABOR DELEGATE

WASHINGTON—Though but 27 years of age, George Bouillot is a labor leader among the working women of France. She's in Washington as a delegate to the International Congress of Working Women. She led the fight in France for Saturday half holidays and a minimum wage bill.

seems certain that the teams played with twenty-five men on a side, some of the Princeton accounts of the game state that there were only twenty-two. The second game between the two colleges was won by Princeton, but the third was not played. Difficulty in arriving at an understanding on the rules was the main reason for canceling the play-off.

Twelve of the Rutgers men who took part in the game are still living. They include the Rev. Dr. William J. Leggett, the Rev. Dr. John A. Van Neste, the Rev. William H. McKee, the Rev. Frederick E. Allen, the Rev. Jacob O. Van Fleet, and the Rev. Charles S. Wright, representing the church; E. D. de la Mated, George E. Pace, George H. Large, John W. Herbert, lawyers of New York and New Jersey; Stephen G. Gano, civil engineer, and Madison M. Ball, teacher. Six who played on the Princeton team are living, including Chief Justice Gummere, Hughes Olinant of Washington, D. C., who amassed a fortune as a railroad and mining engineer; the Rev. Charles S. Barrett, a New Jersey clergyman; William P. Lane, lawyer, manufacturer, banker, and for several years postmaster at Hagerstown, Md.; his brother Charles S., a banker of Hagerstown and vice president of the American Bankers' association, and Alexander Van Rensselaer, who is one of the leading citizens of Philadelphia.

## TELLS DYSPEPTICS WHAT TO EAT

Avoid Indigestion, Sour Acid Stomach, Heartburn, Gas On Stomach, Etc.

Indigestion and practically all forms of stomach trouble, say medical authorities, are due nine times out of ten to an excess of hydrochloric acid in the stomach. Chronic "acid stomach" is exceedingly dangerous and sufferers should do either one of two things.

Either they can go on a "limited and often disagreeable diet, avoiding foods that disagree with them, that irritate the stomach and lead to excess acid secretion or they can eat as they please to counteract the effect of the harmful acid and prevent the formation of gas, sourness or premature fermentation by the use of a little Bisurated Magnesia at their meals.

There is probably no better, safer or more reliable stomach antacid than Bisurated Magnesia and it is widely used for this purpose. It has no direct action on the stomach and is not a digestant. But a teaspoonful of the powder or a couple of five grain tablets taken in a little water with the food will neutralize the excess acidity which may be present and prevent its further formation. This removes the whole cause of the trouble and the meal digests naturally and healthfully without need of peptic pills or artificial digestants.

Get a few ounces of Bisurated Magnesia from any reliable druggist. Ask for either powder or tablets. It never comes as a liquid, milk or citrate and in the bisurated form is not a laxative. Try this plan and eat what you want at your next meal and see if this isn't the best advice you ever had "on what to eat."—Advertisement.

## Davis Warriors Win From Saints

KAYSVILLE, Nov. 14.—Davis High school griders presented the L. D. S. even with the "key to the cellar" in the state high school football race here yesterday by defeating the Saints 18 to 2 in a hard-fought game.

Davis scored touchdowns in the first, second and third quarters. The Saints saved themselves from being whitewashed by scoring a safety in the last quarter, thirty seconds before time was called.

One of the largest crowds seen at the local field this season greeted the two tallenders of the league today. The home team played good ball throughout the game and earned its victory.

Layton at end, Halfback Saunders and H. Harvey at center were the stellar attraction of the Davis aggregation, while Quarterback Candland and Captain Sanders starred for the L. D. S. The line-up:

Davis:	L. D. S.
Davis	Ray
D. Harvey	Saunders
Davis	Papworth
H. Harvey	Iwerson
Hender	Peterson
Barker	Worthin
Layton	Thodell
Ledington	P. Cannon
Saunders	Candland
Adams	Margetts

POST MORTEM.

We received this letter from a Cincinnati fan yesterday:

"The Rath of Cincinnati fell upon the White Sox. More and more did it Groh upon them each time the Sox did Salter forth. They made the Sox Neale to them. They heard their death knell Ring. Luque and See. It was a dump Kopf who pulled a bone, but errors were not so bad, in fact Rariden in other series. Moran more the White Sox worried until they were made to see Red when Ivey let his Wingo."

## Milk Toast Diet Too Much for Her

"I doctored for years with only temporary relief. My liver was very bad after eating I would always have such a fullness in my stomach and my heart would palpitate. I could not eat milk toast without distressing me. Since taking a course of Bile's Wonderful Remedy, more than a year ago, I can eat anything my appetite desires." It is a simple, harmless preparation that removes the catarrhal mucus from the intestinal tract and allays the inflammation which causes practically all stomach, liver and intestinal ailments, including appendicitis. One dose will convince or money refunded. A. R. McIntyre Drug Co., and druggists everywhere.

## Forest Service Range

An announcement made at the forest service yesterday regarding the 110,000,000 acres of land embraced by the service within the national forests is grazed annually by livestock, follows:

In 1918 the enormous forage resource supported approximately 11, 175,467 cattle, sheep, goats and swine. In many parts of the west, such as in the intermountain region, which includes Utah, southern Idaho, eastern Arizona, the livestock industry is the main source of wealth. Naturally this industry is dependent upon a permanent supply of good forage.

Ideal range management is the business of cropping the grazing lands so as to obtain maximum utilization and yet retain the lands in the highest possible state of productivity. As long as there was a supply of grass sufficient to maintain all the stock grazed, no special grazing practices were necessary. Owing to the rapid growth of the livestock industry, however, it was not long until the ranges were badly depleted.

Through the adoption of the individual permit system, whereby the nation

al forest ranges were cropped at least somewhat in proportion to the grazing capacity of the lands, these ranges soon made appreciable improvement. Thanks to the hearty co-operation which the stockmen have given the forest service in the adoption of improved methods of livestock management developed by grazing experts, it is estimated that from 1905 to 1920 the forest ranges increased in productivity from 25 to 10 per cent. This improvement was brought about chiefly by (1) correctly estimating the number of stock that the ranges would support, (2) improved methods in handling livestock, (3) grazing at the proper seasons, (4) development of stock watering places, and (5) rendering the land more accessible to grazing animals by the construction of trails, bridges and other range improvements.

Thorough-going range and pasture experiments were initiated by the forest service in 1907 when investigations of a somewhat general character were started. In 1913 a well equipped forest grazing experiment station was located on the Mancos national forest in central Utah. The station, known as the Great Basin forest (grazing) experiment station, is situated at an elevation of 9000 feet in the heart of the cattle and sheep industry of Utah. The problems under investigation are concerned with range improvement problems, generally, the principles developed of which are applicable to the entire west. Studies are also being conducted at this station with a view of determining the forest forestry practices, and included trials in tree planting and forest management generally.

An enraged man tears his hair, but an enraged woman tears her husband's.

Brass castings may be cleaned in an instant by dipping them into a solution of three parts of sulphuric acid and three parts nitric acid, to which after they have been mixed there has been added one quart of common salt. The whole being stirred until the salt has dissolved. If this mixture is placed in an earthenware vessel the brass castings can be dipped in it, removed immediately and rinsed in clear water. The castings can be made as bright as new by this method, and little labor is involved.

Stomach acidity causes indigestion! Food souring, gas, distress! Wonder what upset your stomach? Well, don't bother! The moment you eat a tablet or two of Pape's Diapepsin all the lumps of indigestion pain, the sourness, heartburn and belching or gases, due to acidity, vanish—truly wonderful!

Millions of people know that it is needless to be bothered with indigestion, dyspepsia or a disordered stomach. A few tablets of Pape's Diapepsin neutralize acidity and give relief at once—no waiting! Buy a box of Pape's Diapepsin now! Don't stay miserable! Try to regulate your stomach so you can eat favorite foods without causing distress. The cost is so little. The benefits so great. You, too, will be a Diapepsin enthusiast, afterwards.—Advertisement.

## INDIGESTION

"Pape's Diapepsin" is the quickest, surest relief for a Sour, Acid, Gassy Stomach—Distress vanishes!

## Middle Aged Women

Women should take warning from such symptoms as heat flashes, shortness of breath, excessive nervousness, irritability, and the blues—which indicate the approach of the inevitable "Change" that comes to all women nearing middle age. We have published volumes of proof that Lydia E. Pinkham's Vegetable Compound is the greatest aid women can have during this trying period.

Read About These Two Women: Fremont, O.—"I was passing through the critical period of life, being forty-six years of age and had all the symptoms incident to that change—heat flashes, nervousness, and was in a general run-down condition, so it was hard for me to do my work. Lydia E. Pinkham's Vegetable Compound was recommended to me as the best remedy for my troubles, which it surely proved to be. I feel better and stronger in every way since taking it, and the annoying symptoms have disappeared."—Mrs. M. Gordon, 925 Napoleon St., Fremont, Ohio.

Urbana, Ill.—"During Change of Life, in addition to its annoying symptoms I had an attack of grippe which lasted all winter and left me in a weakened condition. I felt at times that I would never be well again. I read of Lydia E. Pinkham's Vegetable Compound and what it did for women passing through the Change of Life, so I told my doctor I would try it. I soon began to gain in strength and the annoying symptoms disappeared and your Vegetable Compound has made me a well, strong woman so I do all my own housework. I cannot recommend Lydia E. Pinkham's Vegetable Compound too highly to women passing through the Change of Life."—Mrs. Frank Henson, 1316 South Orchard Street, Urbana, Ill.
